WHAT ARE MMR?

We are a team of **mining enthusiasts** looking to
build the biggest NFT mining community

Our professional skills align with the work required to complete our mission. We will conduct such an operation in Dubai's international free-zone authority; allowing access to cheaper electricity than Europe and easier real-world expansion as we can operate untaxed.

Our first mining development will be a state-of-the-art **GPU ETH mine** followed by reinvestment into **ASIC BTC miners**.

**MUTANT
MINER
RATS**

OUR MISSION

Mutant Miner Rats is a **brand**. The swarm is **inevitable**. Our ecosystem is **sustainable**. Throughout history, Rats have notoriously survived and flourished in the harshest conditions; we mimic the same drive in the NFT space as we develop a sustainable, long-lasting project that delivers real value back to its holders. **Branding, Business and Community** always come first as we move forward, ensuring our success even through turbulent times....

With arguably **the best artwork on Solana, a die-hard community, qualified developers** and a solid **real-world utility**, we already possess all of the criteria to become the **next Solana Blue-chip NFT**.

ROADMAP

MUTANT
MINER
RATS

STAGE 1

- ✓ List on Magic Eden/Opensea
- ✓ Establish DAO through verification of holders
- ✓ Onboard new team members
- ✓ Focus heavily on community/holder development
- ✓ Obtain Emirates ID , Business Visa and bank accounts
- ✓ Establish NFT and Data Mining Companies in Dubai's free-zone
- ✓ Bi-weekly AMA's from founders reviewing progress and goals
- ✓ Boost marketing and brand outreach in anticipation for main launch

STAGE 2

Launch 6666 Mutant Miner Rats (Est. 27th June - 27th July)

- ✓ List on Magic Eden / Opensea
- ✓ Instant dual staking System where holders can stake their Rats + Tools for Mutant \$LUV
- ✓ Deploy Mutant \$LUV Rat Games
- ✓ Begin cable chew game where rat holders can win a hosted GPU
- ✓ Mint proceeds used to fund warehousing, generators and to purchase mining equipment.
- ✓ Target mine fully operational 14-21 days after mint
- ✓ Open workshop where holders can forge new diamond tools in exchange for Mutant \$LUV

STAGE 3

- ✓ Begin SOL airdrops to Rat + Toolset Holders after first month of operation
- ✓ Receive investment from clients/holders for Mutant Miner Hosting
- ✓ 25% of clients profits goes towards holders rewards pool
- ✓ Expand Mutant Miner Company
- ✓ Expand Mutant Miner Universe

WHAT HAVE WE ACCOMPLISHED SO FAR

1

We **sold out our Mutant Miner Tools** within 5 seconds during our public sale.

2

Tools Floor Price currently **fluctuates around 4-5x mint price** (which was 0.169 SOL) and we have never reached more than 10% listed.

3

We have used the mint funding to **establish two companies in Dubai**: 1 licensed to sell NFTs and 1 licensed to Mine.

4

All of this has been paid for in full using royalties/mint funds from our Mutant Miner Tools collection (**20,000 USD+**)

5

We have **established our Mutant Miner DAO** and have assigned special roles, primarily consisting of whales and diamond handed individuals.

6

We have **onboarded two amazing community managers** Tobi and Toni as we prepare for a full-scale Dubai operation

7

We have onboarded an **Alpha Hunter**, who provides great calls for our Tool holders. As well as a **new marketing specialist** who has experience with blue chip projects.

MUTANT MINER TOOLS

Mutant Miner Tools will be the cheapest entry (**not for long**) into our ecosystem. There are **4 different tools** (25% supply each), which you can equip your rat with resulting in different effects.

The 3333 animated Mutant Miner Tools collection will consist of **15% Gold, 30% Silver and 55% Bronze Tools**.

Simple ownership of 1 tool grants you entry into our **DAO**, priority on WL, and a basic mutant \$LUV multiplier when staked with a Mutant Miner Rat.

In total, there can be only 833 full sets of tools. Therefore, the pay-out of our crypto mine will be divided by the respective amount of full tool sets being staked.

Holding 1 of each type is the only mechanism through which holders can receive direct rewards from our Mined crypto:

Bronze simply provides access through a **1x** multiplier. Holding one of each type all in Silver or Gold, grants you a **1.25x** and **1.5x** Mining Profits multiplier respectively.

If you hold a full set of tools, you are eligible for access to our presale, a day earlier, for the main collection: Mutant Miner Rats.

**MUTANT
MINER
RATS**

MUTANT MINER TOOLS: MINT FUNDS

The available funding (**\$24,623**) from our successful tool mint has been used in accordance with the following:

Founders

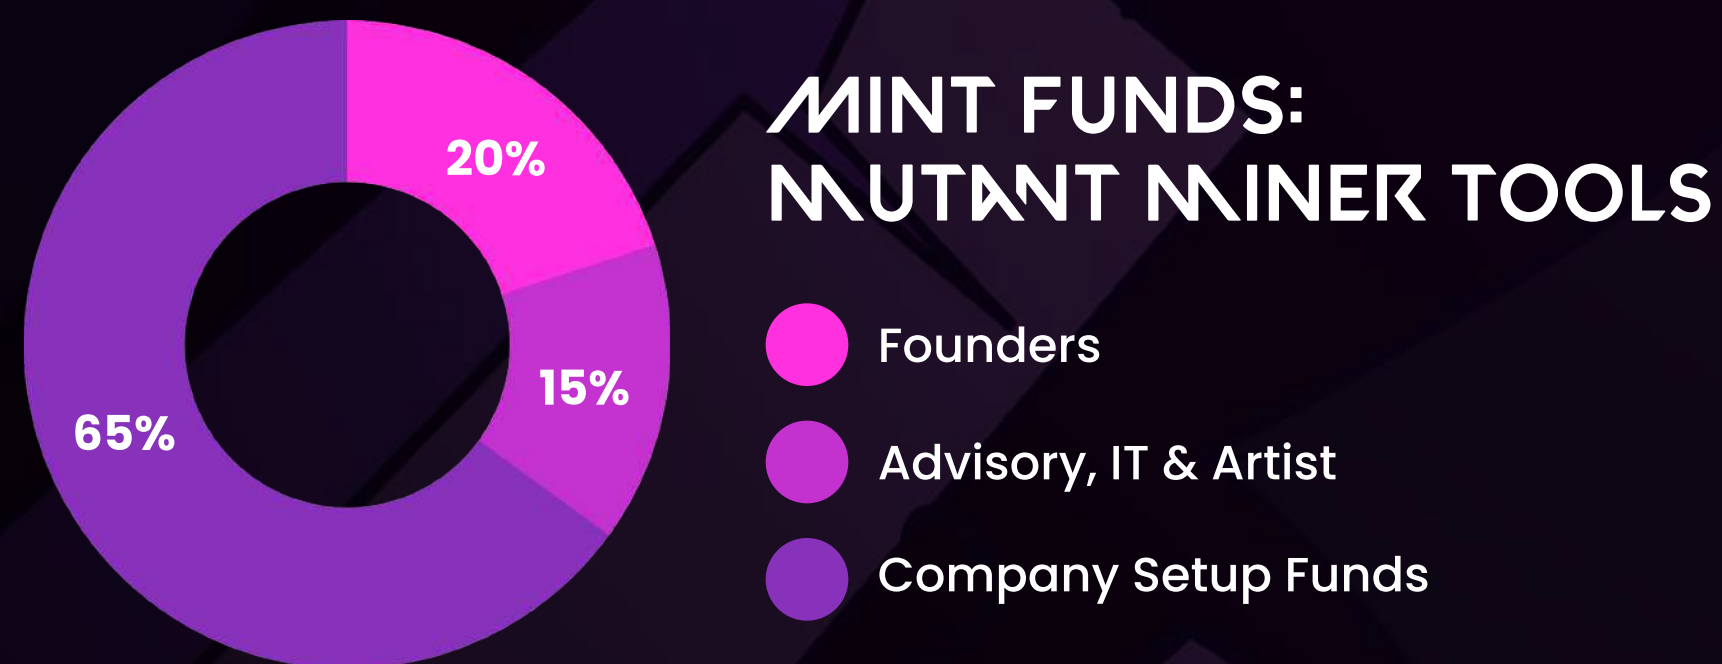

The founders took as little as possible out of the Mint Funds to ensure enough funding was available to establish both companies (NFT & Mining Company), but enough to sustain this project being a full-time career option.

Advisory, IT & Artist

This includes development of artwork, animation, token distribution, mint site, consultancy, branding, and backend technical support. Furthermore, the fundings will be used for development steps needed for the main collection.

Company Setup Funds

The majority of Mint Funding was used in the manner depicted in the following graphic.

JULY

Mint date

Mutant Miner Rats are the bread and butter of our project. These cute rodents are the public representation of our brand, ecosystem, and vision. Each cute but cruel rat is **artistically unique** and is required to be staked alongside 4 Tools to access our mining rewards pool.

Additionally, staking your Mutant Miner Rat will provide you with Mutant \$LUV which can then be used to **forge new tools**, play games online, purchase GPUs/mining equipment, participate in our Cable Chew game and **much much more**.

MUTANT MINER RATS

Once you have purchased a full tool set, to access our mining profit pool, you need to dual stake one Mutant Miner Rat for each set held.

Having both of our companies already established means that all available mint funding can be utilised for mining equipment and infrastructure as soon as we sell-out. Thus, leaving no room for downtime or stagnation within the early

development of our Mutant Mine.

The staking option will be available shortly after the successful mint.

Transparency between our team and holders is a key aspect we wish to maintain as we progress, considering this, below is a graph displaying how available mint funding will be utilised.

TOKENOMICS

MUTANT LUV <\$mLUV>

In addition to mining cryptocurrency, your Mutant Miner Rat will be mining \$mLUV. \$mLUV is the utility token that will be used in our universe.

\$mLUV TOTAL SUPPLY

- Staking Pool
- Trading (\$LUV Treasury)
- Team & Advisors
- DAO Treasury
- Marketing & Partners

MUTANT
MINER
RATS

TOKENOMICS

\$LUV TREASURY

\$mLUV is a micro-ecosystem of \$LUV, the token of DeFi District. The value of \$mLUV is supported by a treasury of \$LUV, where holders can exchange their \$mLUV to \$LUV or vice versa. The value of \$mLUV is tied to the value of \$LUV and our holders gain additional access to \$LUV utility (i.e., Airbnb stays, Real Estate Consulting, Gaming, Lotteries, and more items).

We have dedicated 5% of the supply of \$mLUV to be stored to provide for exchanges between \$LUV and \$mLUV.

Initial Conversion Rate: 200 \$mLUV = 1 \$LUV (This will increase as we add more \$LUV to our treasury)

VIEW \$LUV TOKENOMICS

UTILITIES

TOOL RARITY AND PAYOUTS

We will be paying out profit from our Ethereum miners monthly. The mined \$ETH will be converted to \$SOL and paid out to staked NFTs. The rarity of your Tools will increase the payout percentage you receive.

RAFFLES

Our holders will have access to Raffles with \$mLUV or \$LUV for various prizes.

THE JOKER TOOL

Staked Rat holders will be able to forge a Joker Tool in exchange for \$mLUV. The Joker Tool is an interchangeable item acting as any missing tool type/rarity, yielding an additional staking bonus.

**MUTANT
MINER
RATS**

UTILITIES

CASINO

Our holders will have access to Casino Games with \$mLUV or \$LUV.

MUTANT MARKETPLACE

Expected to be **operational by 2023**; our holders will have access to a marketplace to purchase in-real-life items with \$mLUV or \$LUV. These items include GPU mining rigs we build and send to you, hosted ASIC and GPU miners, Mutant Miner merchandise, high quality posters and **much much more...**

THE CABLE GAME

This is our community game that is to be played weekly and streamed on our Discord. The game is played in real-time with 2-minute rounds until a winner is determined.

MUTANT
MINER
RATS

UTILITIES: THE CABLE GAMES

HOW IT WORKS?

1

The user pays 10 \$mLUV to play the game.

2

If the user dies, they can pay another 10 \$mLUV for an additional life, as long as the round is still going. Once the round closes and you haven't survived, you lose.

3

If the user survives, they move to the following round.

4

The game continues until only one user remains, which is crowned our winning rat.

5

The winner receives a grand prize: direct lifetime profits generated from a GPU which we purchase for you and host in our Mutant Mine.

NFT COMPANY

To begin our journey towards bridging Web2.0 and Web3.0 we found it necessary to form a company in Dubai's International Freezone Authority. This company is licensed to trade crypto commodities and will act as the mechanism through which we are able to fund real world developments with cryptocurrency generated from our Holders.

- ✓ Invoicing of services required from other Companies, including Data Hosting and Mining
- ✓ Increased start-up costs but no operational tax as we expand and become profitable
- ✓ Purchases of equipment and infrastructure with fiat as we expand and grow our ecosystem
- ✓ Opportunities to assist other Projects looking to expand into real world corporations

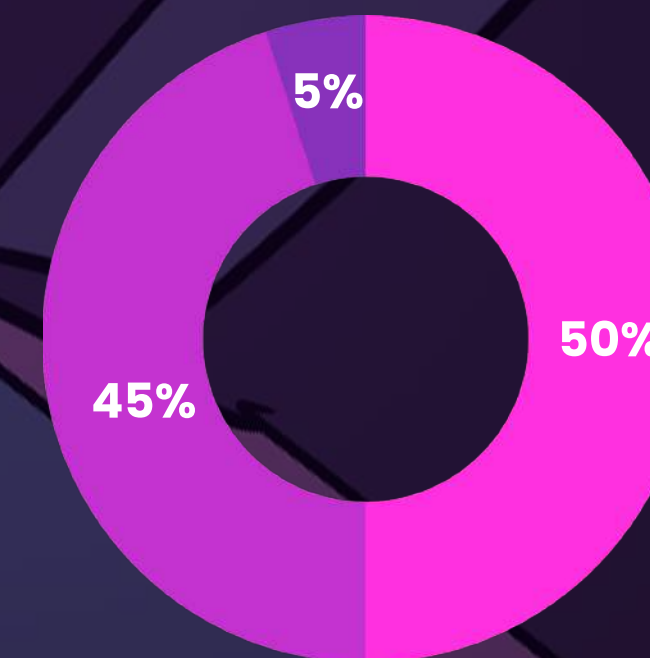

MINING COMPANY

The second company we will have established is one licensed to mine. This will be the financial instrument we use to establish our profitable Mutant Mining Rig. The warehouse will be located in an industrial park, giving us access to bulk and cheaper electricity. We will be installing Nvidia Rtx 3080 GPUs into our mutant mining rig, benefiting from the economies of scale of bulk purchasing the units with the available funding.

The profits from our mining operation will be distributed as follows:

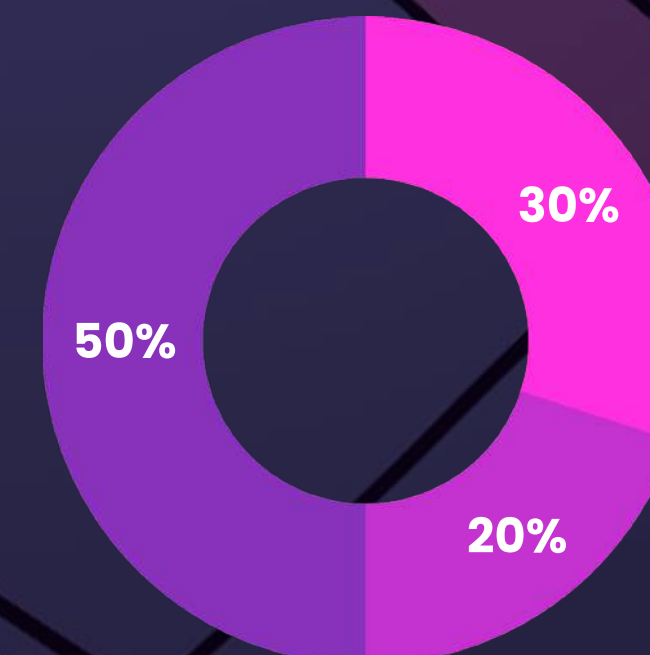

Given the current price of Solana (\$40) restricting the amount of capital expenditure we have in fiat, we would be generating 0.72 ETH per day in revenue and 0.51 in profits. This is only a base value and can be subject to increase if the price of Solana increases when the funding is transferred.

Taking into account the 50% Royalty reinvestment and 50% Operational Profit reinvestment, We are able to generate a forecasted compound earnings over the next 10 months. (Assuming 2-3x ASIC 110THs BTC miners are purchased each month). 7.33 ETH (45% of profits) is to be airdropped to staked full toolset + rat holders within the first month.

MINING PROFITS

- Reinvestment into Miners
- SOL Rewards Pool
- \$LUV

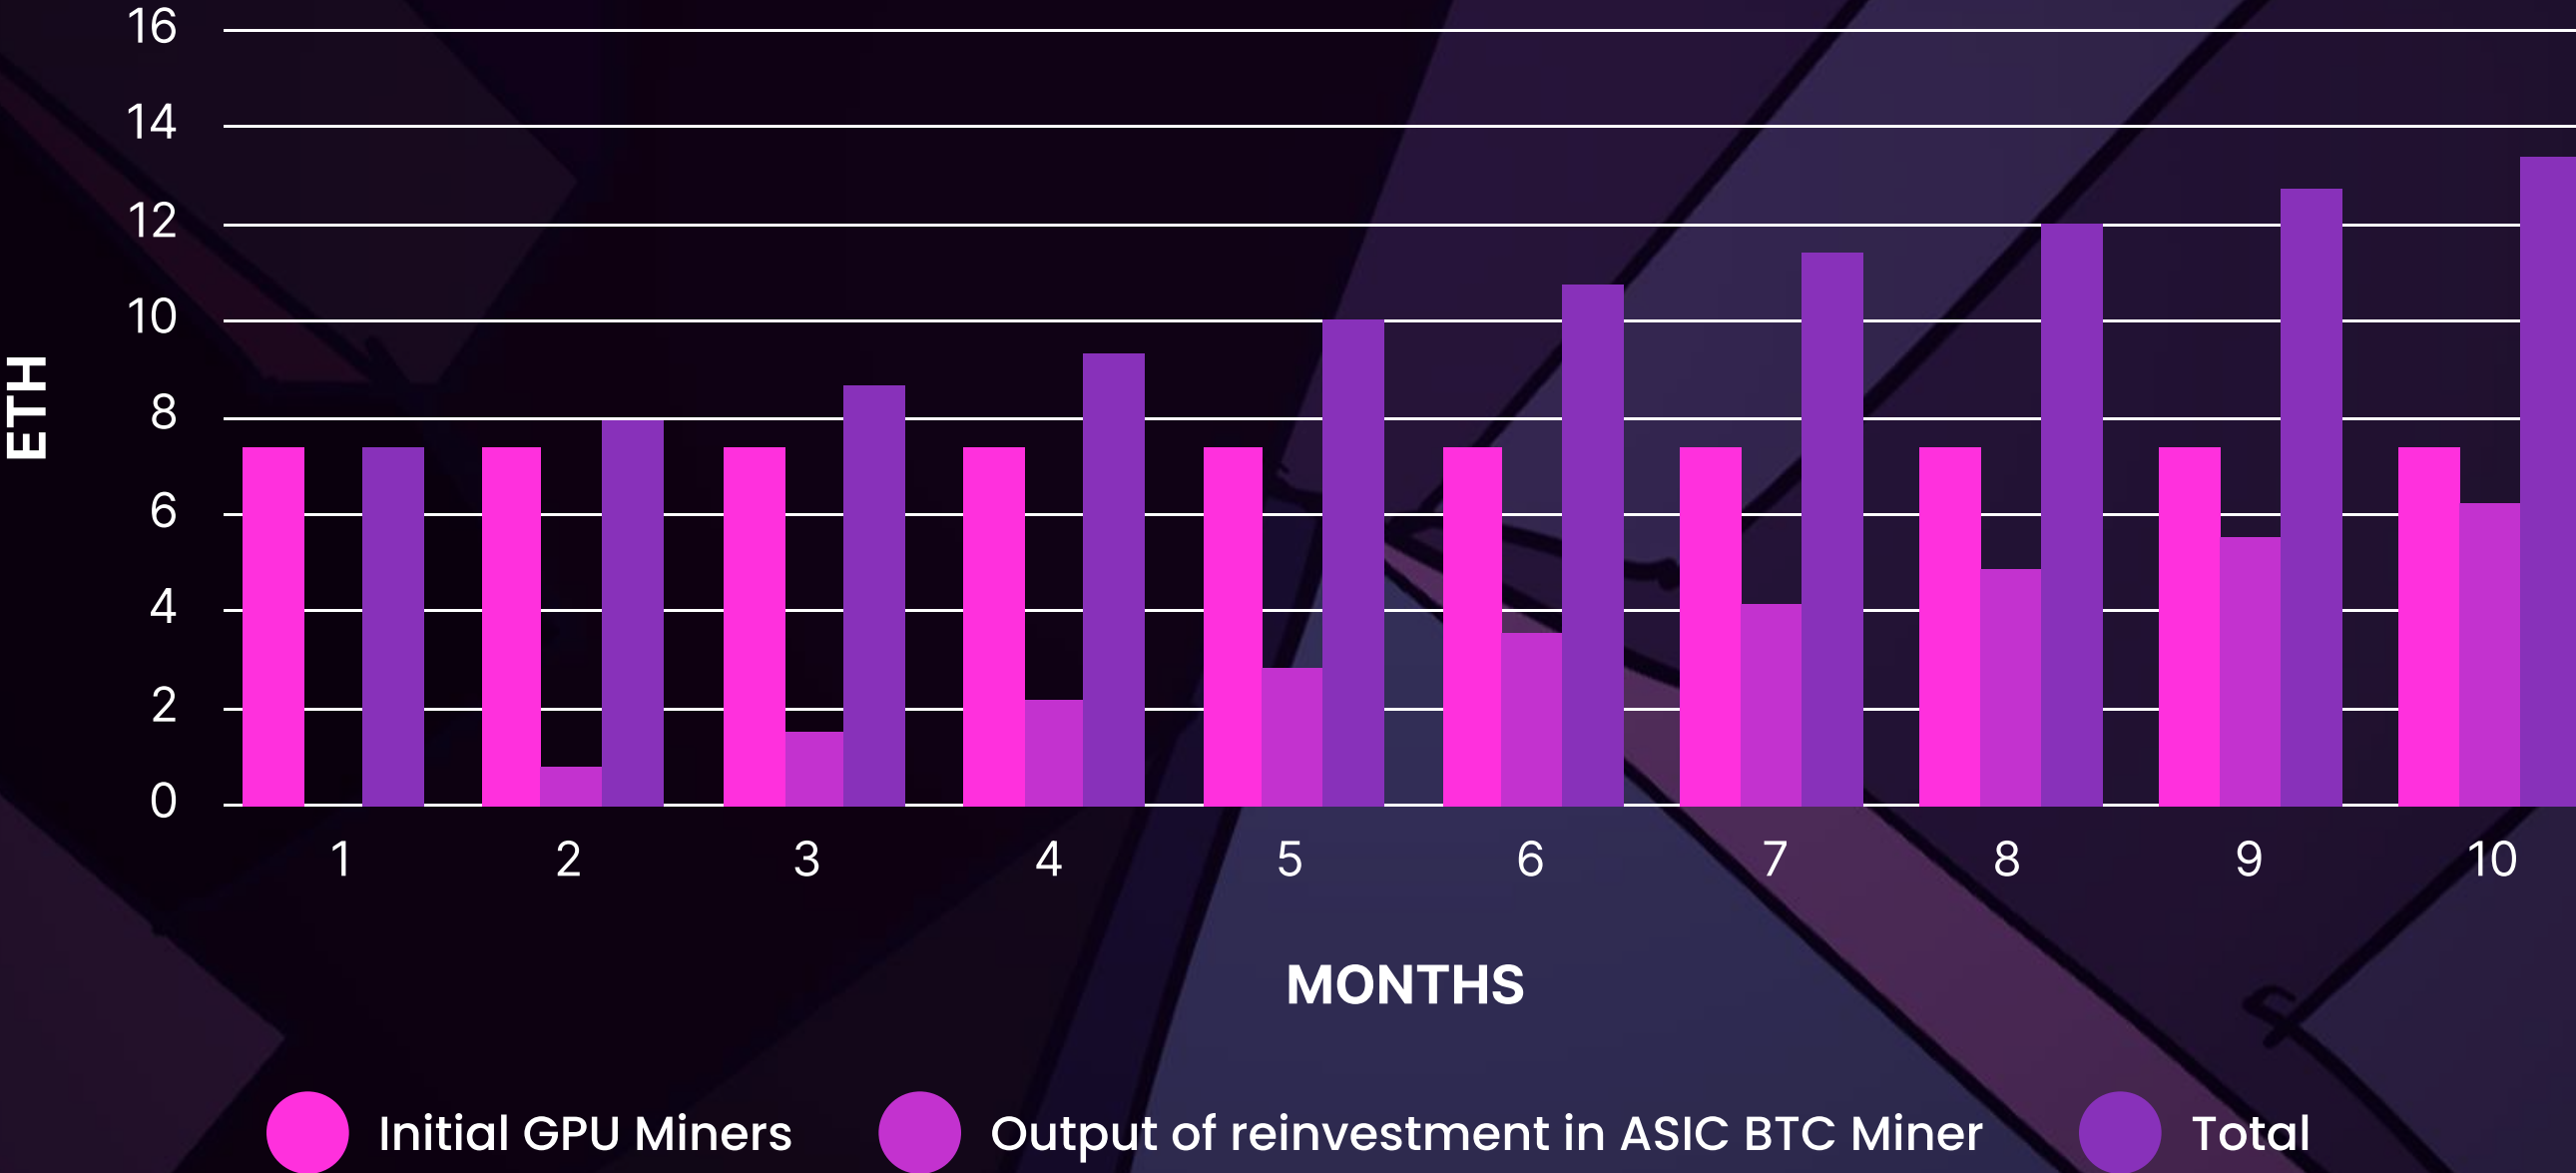

ROYALTIES PROFITS

- Founders & Team
- Reinvestment into Miners

MUTANT
MINER
RATS

MINING COMPANY

ETH OUTPUT PER MONTH FOR SOL PAYOUT POOL

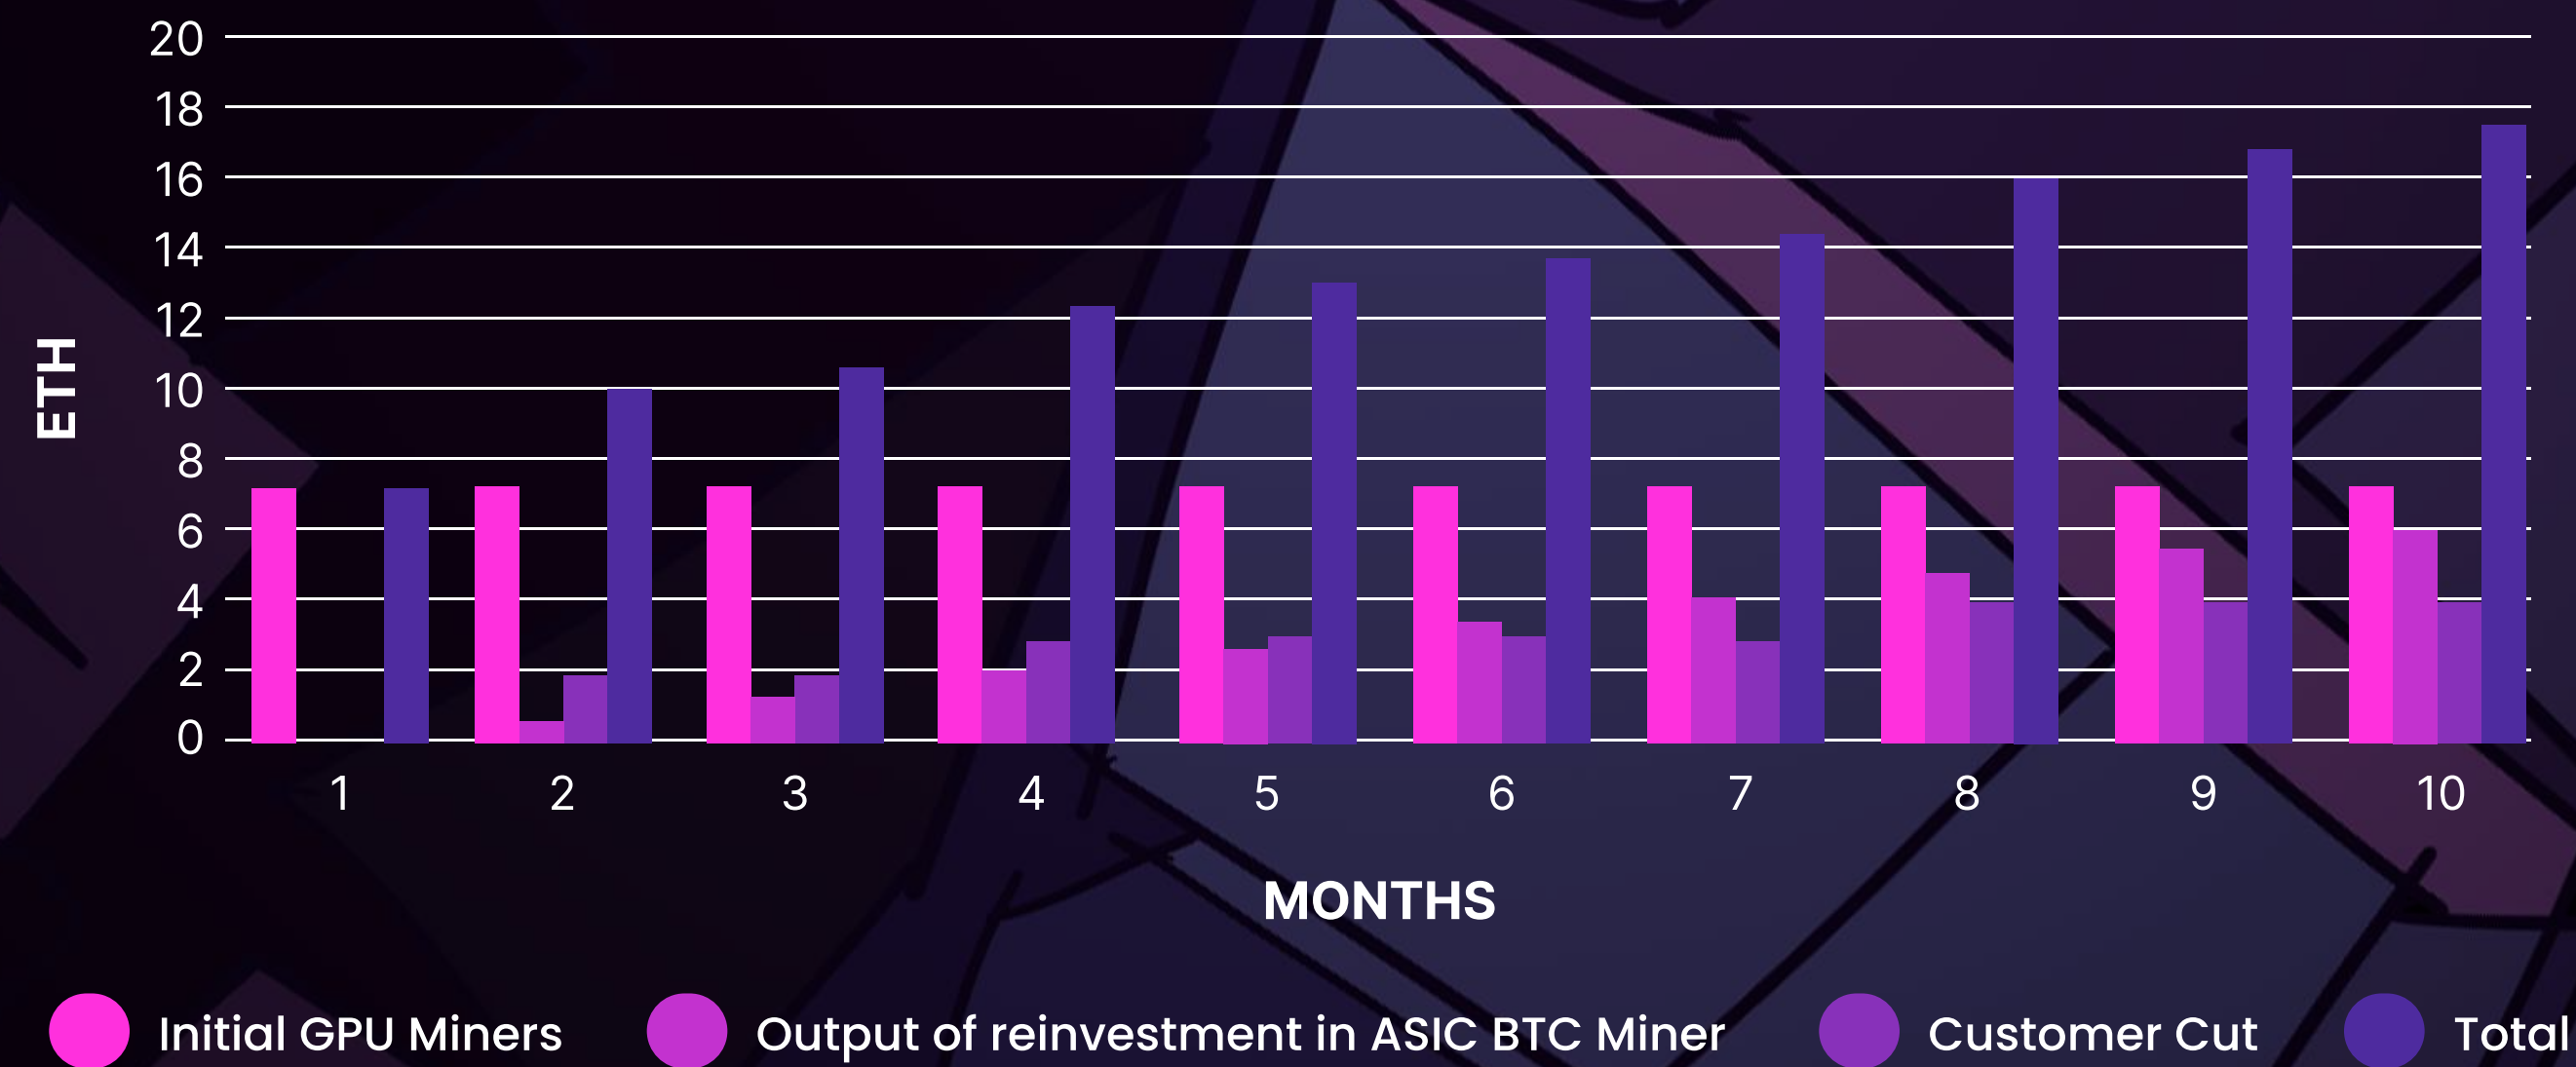

Currently, we have \$200,000 in customer investment towards BTC miners lined up after our mine is operational. Taking into account 25% of all investors profits will be added to our mining rewards pool, we can witness the effect this has on holders payout.

MINING COMPANY

This is assuming a singular one time investment. Our company will be constantly on boarding new clients as we grow and consistently looking for additional investment into our MMR Hosting services. We believe that this income stream has the largest potential to exponentially increase holder payout as we further develop our real world business. Additionally, we will be looking for clients in Web3.0: Investors, Whales, Holders and other projects will all have the opportunity to invest.

ZAIN CEO

Hi, I'm Zain.

I'm a 23 year old Renewable Energy/Materials Engineer from London. I'm very business and artistically minded, applying this wherever I can to Mutant Miner Rats. The first mining experience I had was in October of 2020, when I setup and installed my 2 RTX 3060 Ti's, using nicehash. I soon realised this could be massively profitable when economies of scale were applied, giving me the conviction needed to start this project. Moreover, I plan to use my professional expertise to try and establish a clean, cheap and sustainable energy supply for our Mutant Mining Rig!

I've been into NFTs heavily since August 2021 and have always dreamt of leading my own community full of crypto and art enthusiasts; this coupled with large-scale profit generation, presents itself as the ideal recipe for a successful long-term project!

With my amazing CFO, CTO and advisors by my side, we begin to bridge the gap between NFTs and real world utility!

So come join the swarm!

LUCAS CFO

I am known as Lucky but Rat, am in my mid-twenties and based in Germany. During my studies, I was able to meet many people in my home country and during my semester abroad, which broadened my horizon. My family and friends say that I am a workaholic as I need to be at least 110% busy.

Currently, I am working as a consultant for IT, Finance and M&A projects. I get to look at the world of corporations while working my way through stocks, crypto & NFTs. In the process, I have also stumbled upon mining crypto currencies: Helium, ETH, BTC, etc. But why not build a huge mine with an equally dedicated Brit in the middle of the desert? Together with my business partner/buddy, we want to link another Solana NFT project with a real-life business. I always think of: Take every shot you can without regrets.

LEGOLALZ THE RAT TEAM

Hello friends, my name is Legolalz and I am Collaboration Manager and multi-talent for Mutant Miner Rats. I'm from the same city as Lucky in Germany (coincidence?) and I'm one of the few on the team with a normal sleep schedule.

I came to Solana NFTs via Ethereum NFTs and since then the market has always fascinated me. In my real life, I have worked for big brands like Amazon or Sky Television, but also for a startup, all of which had one thing in common: they were maximally customer-centric.

With more than 6 years of experience in Customer Relationship Management, Marketing and Product Management, you can be sure that for me the community will always come first. We will always listen. Let's make Mutant Miner Rats a success, together.

WRONGPLACEWRONGTIME TEAM

Hi, I go by WrongPlaceWrongTime and I'm a Collaboration Manager and all around Handy-Man for Mutant Miner Rats. I am based in the Midwest of the great USA (although my sleep schedule might beg to differ).

I got into crypto at around 2018 and have been in love with it since. I started off with Ethereum, and after a lot of time and effort built my own gaming PC which I use to mine ETH. After that I was introduced to NFT's through some sneaker buddies and the rest is history.

Since then I have worked as a Community Manager and Advisor for multiple projects across ETH, AVAX, and of course Solana. In real life I have 3 years of experience in both Customer Service and Sales. On top of that I am also a sophomore in college studying Computer Science. Twitter: @WPWT
